

Village of Delia

[Continued from previous column]

Readers of The Delia Times who have not yet paid their subscription are reminded that it

The most likely tree fruit is the crab apple, of which Queen is the sweetest and most productive at the substitution. One tree of it which bore 60 pounds in 1988, had 110 pounds in 1989. Other more or less productive varieties have been Ogo, Holgo, Columbia, Florence, and, lately Potosi.

The United States department of agriculture calculates that the parity price for wheat is around \$1.10 bushel.

Sudetan Settlers

Repatriating Making Good At Settlements in British Columbia

"A former economic prodigy at Prague University has become an expert trader operating, as a doctor who graduated from the same university has become a splendid surgeon," said Peter McClelland, supervisor in charge of the Sudetan settlement at Tupper, B.C., in discussing the ways in which the 500 Czechoslovakian refugees had adjusted themselves to their new Canadian home.

On 20,000 acres of land purchased at the request of the government, these people were living happily and happily as farmers and gardeners, he said.

"The things they like best about life on the frontiers of a neighboring settler and the fact that they don't have to report to police officers every action," said Mr. McClelland, who was visiting Calgary.

Among the colonies are Czechs, Slovaks, Thuringians and a few Jewish families of mixed religious education.

They are being housed together by a special district for Slavians.

Not Allowed To Campaign

Wartime Morale Of German Citizens Warned By Government

The German government is warning citizens to keep up on the citizens' wartime morale. It has instructed a drive on the frontiers of the German people to make cheerful reports to their headquarters on the morale of the general public.

Nazi party district and ward leaders in a number of the principal German cities have been instructed to make cheerful reports to their headquarters on the morale of the general public.

It was revealed that Adolf Hitler at the start of the war had ordered Nazi party leaders responsible for maintenance of morale in districts under their supervision. It was at the time declared that he did not want to be informed that the people's morale was poor in any of his districts.

And those propagandists who are Nazi party leaders have been told to watch carefully the reactions of the people in their districts and to report to the government any complaints or suggestions.

It was also understood that those who are instructed within the past few weeks to permit to their headquarters in their shops and to note any complaints or suggestions are particularly keen to complain.

Bomber Production In Britain

Roll Out Daily To Avoid The Storm Or Royal Air Force

Throughout the night tradition in a certain district in Britain can hear the rumbling and roaring of aircraft engines. This is not because the noise comes from half a dozen giant Whitleys being rolled out onto the tarmac before the dawn of a "shadow" hour.

At 11 o'clock, planes are rolled out daily how many only the highly trained members roll out to greet the strength of the Royal Air Force, bringing it swiftly forward things which would otherwise be lost. It will be the world's most powerful.

The newly-activated night in production line a long story of industrial expansion and plant conversion that goes back to May, 1935.

It was then the British government realized that with a new arm which it had hoped might be avoided was inevitable.

The 1935 expansion program was shelved for completion by March, 1937, but before then developments in Germany revealed that still more expansion was necessary and a larger program was planned in February, 1938, for completion by March, 1939.

Although the military situation simultaneously brought attention to realize they were not alone in their expansion program. Great Britain for sudden and vigorous action.

The situation in 1937 brought about an even greater degree of industrial expansion of aircraft production was more than doubled. Before the outbreak of war it was four times greater than in 1935.

It was in this mounting expansion are those companies specializing in aircraft increased their productive capacity. Some of the most of the service themselves as orders increased; others, as they were ordered to do so previously by the committee of industrial experts, were called to help.

At the time, the government decided to build new aircraft. The work was ready familiar with the "shadow" program, they were called to help.

The plan, "sub-contracting," gave smaller plants the manufacture of aircraft components which they could then assemble for the main contractor.

Barometer As Health Gauge

Air Pressure Affects Physical Well-Being According To Pathologist

General well-being as well as the weather may be signalled by the barometer, according to Dr. William F. Peterson, pathologist and bacteriologist at the University of Illinois.

The next time you feel a growth coming on, consult the barometer. It is ten to one, said Dr. Peterson, that the barometric pressure will be going up.

The doctor asserted that air pressure plays an important role in health. Sudden drops and even slight changes are some of the factors which are most of the British race everywhere, changing the atmosphere of the world.

Quoting and Goebbels continued to build theories. The British do not understand. But they have been found to meet every lack of the British race everywhere, changing the atmosphere of the world.
